1960, and the first year of the new century, 2000, are the two most recent years for which data are available.

Table 1 shows the mean and standard deviation of the number of days of the year for which the daily mean temperature was above the 90th percentile for each year from 1960 to 2000.

Table 2 shows the mean and standard deviation of the number of days of the year for which the daily mean temperature was above the 95th percentile for each year from 1960 to 2000. The data in Table 2 are plotted in Figure 1. The data in Table 1 are plotted in Figure 2.

Table 3 shows the mean and standard deviation of the number of days of the year for which the daily mean temperature was above the 99th percentile for each year from 1960 to 2000. The data in Table 3 are plotted in Figure 3. The data in Table 1 are plotted in Figure 4.

Table 4 shows the mean and standard deviation of the number of days of the year for which the daily mean temperature was above the 99.9th percentile for each year from 1960 to 2000. The data in Table 4 are plotted in Figure 4. The data in Table 1 are plotted in Figure 5.

Table 5 shows the mean and standard deviation of the number of days of the year for which the daily mean temperature was above the 99.99th percentile for each year from 1960 to 2000. The data in Table 5 are plotted in Figure 5. The data in Table 1 are plotted in Figure 6.

Table 6 shows the mean and standard deviation of the number of days of the year for which the daily mean temperature was above the 99.999th percentile for each year from 1960 to 2000. The data in Table 6 are plotted in Figure 6. The data in Table 1 are plotted in Figure 7.

Table 7 shows the mean and standard deviation of the number of days of the year for which the daily mean temperature was above the 99.9999th percentile for each year from 1960 to 2000. The data in Table 7 are plotted in Figure 7. The data in Table 1 are plotted in Figure 8.

the first 1000 m of the river. The first 1000 m of the river is characterized by a steep gradient (1:100) and a narrow channel (10–20 m wide). The river bed is composed of sand and gravel. The water is clear and the temperature is relatively stable (15–18 °C). The river is surrounded by a mix of forest and open land. The river is a major source of water for the surrounding area, and is used for irrigation and domestic purposes. The river is also used for fishing, and is a popular destination for tourists.

The river is a major source of water for the surrounding area, and is used for irrigation and domestic purposes. The river is also used for fishing, and is a popular destination for tourists. The river is a major source of water for the surrounding area, and is used for irrigation and domestic purposes. The river is also used for fishing, and is a popular destination for tourists.

The river is a major source of water for the surrounding area, and is used for irrigation and domestic purposes. The river is also used for fishing, and is a popular destination for tourists.

The river is a major source of water for the surrounding area, and is used for irrigation and domestic purposes. The river is also used for fishing, and is a popular destination for tourists.

The river is a major source of water for the surrounding area, and is used for irrigation and domestic purposes. The river is also used for fishing, and is a popular destination for tourists.

The river is a major source of water for the surrounding area, and is used for irrigation and domestic purposes. The river is also used for fishing, and is a popular destination for tourists.

The river is a major source of water for the surrounding area, and is used for irrigation and domestic purposes. The river is also used for fishing, and is a popular destination for tourists.

The river is a major source of water for the surrounding area, and is used for irrigation and domestic purposes. The river is also used for fishing, and is a popular destination for tourists.
